## Notes

## </> Repositories

Software repositories associated with this project.

The chart displays the distribution of various GitHub repository metrics. The metrics are listed on the x-axis: Name, Tags, Last Commit, Avg Issue, Avg PR, Languages, License, Readme, Contributing, and Dependencies. The y-axis represents a score from 6 to 9. A blue line with circular markers shows the distribution, which is mostly flat around a score of 6.5, with a sharp spike to 9 for the 'License' metric. A light blue shaded area highlights the 'License' metric.

Metric	Score (approx.)
Name	6.5
Tags	6.5
Last Commit	6.5
Avg Issue	6.5
Avg PR	6.5
Languages	6.5
License	9.0
Readme	6.5
Contributing	6.5
Dependencies	6.5

## Notes

Repository For storing, tracking changes to, and collaborating on a piece of software.

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Avg Issue/PR Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Traffic metrics of websites associated with this project.

## Notes

Active Users [Distinct users who visited the website](#) .

New Users [Users who visited the website for the first time](#) .

Engaged Sessions [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
