

## Core Project R03OD030601

### Details

#### Projects

1R03OD030601-01

#### Name

Using machine learning techniques  
to characterize the Metabolomics  
Workbench Dataset

#### Award

\$263,120.00

#### Publications

1 publications

#### Repositories

0 repositories

#### Analytics

0 properties

### Publications

Published works associated with this project.

| ID                                                                                  | Title                                                                  | Authors                                      | RCR   | SJR | Citations | Cit./year | Journal        | Published | Updated                |

`</>` Repositories

Software repositories associated with this project.

| Name    | Description | Stars | Watchers | Forks | Issues | PRs | Commits | Contrib. |
|---------|-------------|-------|----------|-------|--------|-----|---------|----------|
| No data |             |       |          |       |        |     |         |          |

| Name    | Tags | Last Commit | Avg Issue | Avg PR | Languages | License | Readme | Contributing | Dependencies |
|---------|------|-------------|-----------|--------|-----------|---------|--------|--------------|--------------|
| No data |      |             |           |        |           |         |        |              |              |

Notes

|              |                                                                             |
|--------------|-----------------------------------------------------------------------------|
| Repository   | For storing, tracking changes to, and collaborating on a piece of software. |
| PR           | "Pull request", a draft change (new feature, bug fix, etc.) to a repo.      |
| Closed/Open  | Resolved/unresolved.                                                        |
| Avg Issue/PR | Average time issues/pull requests stay open for before being closed.        |

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Traffic metrics of websites associated with this project.

### Notes

|                  |                                                                                                                                                        |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Active Users     | <a href="#">Distinct users who visited the website</a>  .             |
| New Users        | <a href="#">Users who visited the website for the first time</a>  . |
| Engaged Sessions | <a href="#">Visits that had significant interaction</a>  .          |

"Top" metrics are measured by number of engaged sessions.
