

## Core Project R03OD038390

### Overview

High-level info about this project.

#### Projects

1R03OD038390-01

#### Name

Ultra-high resolution 3D genome maps for multiple human tissues

#### Award

\$309K

#### Publications

11 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Authors                                            | RCR    | SJR    | Citations | Cit./year | Journal                                   | Published | Updated     |

## Notes

BCR [Relative Citation Ratio](#)

Repository For storing, tracking changes to, and collaborating on a piece of software.

SJR [Scimago Journal Rank](#)

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the main/default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

Website metrics associated with this project.
