

## Core Project R03OD038391

### Overview

High-level info about this project.

#### Projects

1R03OD038391-01

#### Name

Leveraging Heterogenous Common  
Fund Data Sets and Beyond for  
Identifying Lung Cancer Subtypes

#### Award

\$307K

#### Publications

16 publications

#### Repositories

- repositories

#### Analytics

- properties

 Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Author<br>s                                                   | R<br>C<br>R   | SJ<br>R      | Cit<br>ati<br>ons | Cit.<br>/ye<br>ar | Journal                          | Pub<br>lish<br>ed | Upd<br>ated        |

## Notes

|              |                                                                      |
|--------------|----------------------------------------------------------------------|
| Repository   | For storing, tracking changes                                        |
| PR           | "Pull request", a draft change                                       |
| Closed/Open  | Resolved/unresolved.                                                 |
| Issue/PR Avg | Average time issues/pull requests stay open for before being closed. |

Only the main /default branch is considered for metrics like # of commits.

## Notes

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. package.json + package-lock.json.

RCR [Relative Citation Ratio](#)

SJR [Scimago Journal Rank](#)

## Analytics

Website metrics associated with this project.

Built on Jul 4, 2026

Developed with support from NIH Award [U54 OD036472](#)

### Notes

Active Users [Distinct users who visited the website](#) .

New Users [Users who visited the website for the first time](#) .

Engaged Sessions [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
