

## Core Project R03OD032630

### Overview

High-level info about this project.

#### Projects

1R03OD032630-01

#### Name

Methods to maximize the utility of  
common fund functional genomic  
data in multi-ethnic genetic studies

#### Award

\$335K

#### Publications

9 publications

#### Repositories

- repositories

#### Analytics

- properties

 Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Authors                                                               | RC<br>R        | SJR            | Cita<br>tion<br>s | Cit./<br>yea<br>r | Journal            | Publ<br>ishe<br>d | Upda<br>ted        |

## </> Repositories

Software repositories associated with this project.

Sorry, you're not authorized to view this data

a

## Notes

Repository For storing, tracking changes to, and collaborating on a piece of software.

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
