

## Core Project R03OD034499

### Overview

High-level info about this project.

#### Projects

1R03OD034499-01

#### Name

Deciphering the 3D genome of  
pediatric brain tumors

#### Award

\$391K

#### Publications

7 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Authors                                                   | RCR   | SJR    | Citations | Cit./year | Journal                                   | Published | Updated     |

## </> Repositories

Software repositories associated with this project.

Sorry, you're not authorized to view this data

### Notes

|            |                                                                             |
|------------|-----------------------------------------------------------------------------|
| Repository | For storing, tracking changes to, and collaborating on a piece of software. |
| PR         | "Pull request", a draft change (new feature, bug fix, etc.) to a repo.      |

Built on Mar 24, 2026

Developed with support from NIH Award [U54 OD036472](#)

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
