

## Core Project R25OD039834

### Overview

High-level info about this project.

#### Projects

1R25OD039834-01

#### Name

Developing a Hive Learning and  
Datathon Supported Course on  
Imaging and Multimodal Data for  
Resource-Limited Institutions  
(CIMDAR-HIVE)

#### Award

\$370K

#### Publications

8 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Authors                                                                             | R<br>C<br>R | SJ<br>R | Cita<br>tion<br>s | Cit./<br>yea<br>r | Journal                    | Publ<br>ishe<br>d | Upda<br>ted        |

### Notes

|              |                                                                             |
|--------------|-----------------------------------------------------------------------------|
| Repository   | For storing, tracking changes to, and collaborating on a piece of software. |
| PR           | "Pull request", a draft change (new feature, bug fix, etc.) to a repo.      |
| Closed/Open  | Resolved/unresolved.                                                        |
| Issue/PR Avg | Average time issues/pull requests stay open for before being closed         |

Built on Jul 7, 2026

Developed with support from NIH Award [U54 OD036472](#)

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
