

## Core Project R03OD034501

### Overview

High-level info about this project.

#### Projects

1R03OD034501-01

#### Name

Integration of GTEx and HuBMAP  
data to gain population-level cell-  
type-specific insights

#### Award

\$315K

#### Publications

7 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Authors                                        | RCR    | SJR   | Citations | Cit./year | Journal                                                             | Published | Updated      |

### Notes

## </> Repositories

Software repositories associated with this project.

Sorry, you're not authorized to view this data

a

### Notes

Repository      For storing, tracking changes to, and collaborating on a piece of software.

PR                "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open    Resolved/unresolved.

Issue/PR Avg    Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like `#` of commits.

`#` of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

Sorry, you're not authorized to view this data

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
