

## Core Project R03OD036498

### Overview

High-level info about this project.

#### Projects

1R03OD036498-01

#### Name

Discovery of neoepitope  
immunotherapeutic targets in diffuse  
pediatric high-grade gliomas

#### Award

\$356K

#### Publications

4 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                   | Authors                                                               | RC<br>R       | SJ<br>R       | Cita<br>tion<br>s | Cit.<br>/ye<br>ar | Journal                                   | Publ<br>ishe<br>d | Upda<br>ted  |

## </> Repositories

Software repositories associated with this project.

*Loading*

a

### Notes

Repository For storing, tracking changes to, and collaborating on a piece of software.

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
