

## Core Project R03OD032623

### Overview

High-level info about this project.

#### Projects

1R03OD032623-01

#### Name

Using three-dimensional genome  
structure to refine eQTL detection

#### Award

\$335K

#### Publications

1 publications

#### Repositories

- repositories

#### Analytics

- properties

 Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                  | Title                                                                                         | Author<br>s                                            | RC<br>R   | SJR       | Citat<br>ions | Cit./<br>year | Journal                      | Publi<br>shed | Updat<br>ed    |

## </> Repositories

Software repositories associated with this project.

Sorry, you're not authorized to view this data

### Notes

Repository For storing, tracking changes to, and collaborating on a piece of software.

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

## Analytics

Website metrics associated with this project.

Sorry, you're not authorized to view this data

### Notes

Active Users      [Distinct users who visited the website](#) .

New Users      [Users who visited the website for the first time](#) .

Engaged Sessions      [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
