

## Core Project R03OD032666

### Overview

High-level info about this project.

#### Projects

1R03OD032666-01

#### Name

Investigating systems physiology with  
multi-omics data

#### Award

\$311K

#### Publications

5 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                                                | Author<br>s                                                         | RC<br>R       | SJ<br>R       | Cit<br>atio<br>ns | Cit.<br>/ye<br>ar | Journal                                                          | Pub<br>lish<br>ed | Upda<br>ted        |

a

## Notes

Repository For storing, tracking changes to, and collaborating on a piece of software.

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the `main` /default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

Built on Apr 2, 2026

Developed with support from NIH Award [U54 OD036472](#)

## Notes

Active Users [Distinct users who visited the website](#) .

New Users [Users who visited the website for the first time](#) .

Engaged Sessions [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
