

## Core Project R03OD034496

### Overview

High-level info about this project.

#### Projects

1R03OD034496-01

#### Name

Uncovering therapeutic-associated  
biomarkers via machine learning and  
feature engineering approaches

#### Award

\$318K

#### Publications

14 publications

#### Repositories

- repositories

#### Analytics

- properties

## Publications

Published works associated with this project.

| ID                                                                                                                                                                                                                      | Title                                                                    | Authors                                                  | RC<br>R | SJR     | Cita<br>tion<br>s | Cit.<br>/ye<br>ar | Journal                                 | Pub<br>lish<br>ed | Upda<br>ted  |

a

## Notes

RCR [Relative Citation Ratio](#)

Repository For storing, tracking changes to, and collaborating on a piece of software.

SJR [Scimago Journal Rank](#)

PR "Pull request", a draft change (new feature, bug fix, etc.) to a repo.

Closed/Open Resolved/unresolved.

Issue/PR Avg Average time issues/pull requests stay open for before being closed.

Only the main/default branch is considered for metrics like # of commits.

# of dependencies is totaled from all manifests in repo, direct and transitive, e.g. `package.json` + `package-lock.json`.

# Analytics

## Notes

Active Users [Distinct users who visited the website](#) .

New Users [Users who visited the website for the first time](#) .

Engaged Sessions [Visits that had significant interaction](#) .

"Top" metrics are measured by number of engaged sessions.
